MATERIAL SAFETY DATA SHEET (MSDS)

Dolomitic Limestone
Calcium Magnesium Carbonate
Section 1 – IDENTIFICATION

Chemical Name: Calcium Magnesium Carbonate

Supplier/Manufacturer:  
Tri-State Garden Supply Inc. DBA - Gardenscape  
366 Sandy Point Rd.  
Emlenton, PA 16373

Emergency Contact Information  
Jeff Andrey, Manager of Operations  
Cell Phone: 724-355-2208

Product name and synonyms:  

Chemical family Formula:  
Limestone/Dolomite (CAS #1317-65-3) CaCO3 48.0%– 53.44%, MgCO3 – 40.22-44.04%

Section 2 - COMPONENTS

Dolomite (CaMg(CO3)2) – 60-100% by weight (CAS# 16389-88-1)  
Quartz – 0.0-1.0% by weight (CAS #14808-60-7)

Hazardous Ingredients:  
Respirable quartz (CAS# 14808-60-7) – greater than 0.1% by weight, Less than 1.0%  
ACGIH TLV-TWA (2000) = 0.05 mg respirable quartz dust/m3  
OSHA PEL (8-hour TWA) = (10 mg respirable dust/m3)/(percent silica + 2)  
NIOSH REL (8-hour TWA) = 0.05 mg respirable dust/m3

Section 3 - HAZARD IDENTIFICATION

Potential Health Effects

Relevant Routes of Exposure:  
Eye contact, skin contact, inhalation, and ingestion.

Effects Resulting from Eye Contact:  
Exposure to airborne dust may cause immediate or delayed irritation or inflammation.  
Eye contact by large amounts of dry powder or splashes of wet limestone dust may cause effects ranging from moderate eye irritation to corneal abrasions. Such exposures may require immediate first aid (see Section 4) and medical attention to prevent damage to the eye.
Effects Resulting from Skin Contact:
Direct contact may cause irritation by mechanical abrasion.

Effects Resulting from Inhalation:
Limestone may contain trace amounts of free crystalline silica. Prolonged exposure to respirable free silica can aggravate other lung conditions and cause silicosis, a disabling and potentially fatal lung disease.
Exposure to limestone dust may cause irritation to the moist mucous membranes of the nose, throat, and upper respiratory system. It may also leave unpleasant deposits in the nose.

Effects Resulting from Ingestion:
Although small quantities of dust are not known to be harmful, ill effects are possible if larger quantities are consumed.

Carcinogenic potential:
Limestone is not listed as a carcinogen by NTP, OSHA, or IARC. It may however, contain trace amounts of substances listed as carcinogens by these organizations. Crystalline silica, which is a component of limestone, is now classified by IARC as known human carcinogen (Group I). NTP has characterized respirable silica as "reasonably anticipated to be [a] carcinogen".

Medical conditions which may be aggravated by inhalation or dermal exposure:
Pre-existing upper respiratory and lung diseases.

Section 4 - FIRST AID

Eyes
Immediately flush eyes thoroughly with water. Continue flushing eye for at least 15 minutes, including under lids, to remove all particles. Call physician if irritation persists or later develops.

Skin
Wash skin with cool water and pH-neutral soap or a mild detergent. Seek medical treatment if irritation persists or later develops.

Inhalation of Airborne Dust
Remove to fresh air. Seek medical help if coughing and other symptoms do not subside.

Ingestion
Do not induce vomiting. If conscious, have the victim drink plenty of water and call a physician immediately.

Section 5 - FIRE AND EXPLOSION DATA

Flash point ....................None Lower
Explosive Limit...............None
Upper Explosive Limit.....None
Auto ignition temperature.....Not Combustible
Extinguishing media........Not Combustible
Special fire fighting Procedures.......None
Hazardous combustion products.....None
Unusual fire and explosion hazards...None
Section 6 - ACCIDENTAL RELEASE MEASURES
Collect dry material using a scoop. Avoid actions that cause dust to become airborne. Avoid inhalation of dust and contact with skin. None of the components of this product are subject to the reporting requirements of Title III of SARA 1986, and 40 CFR 372.

Section 7 - HANDLING AND STORAGE
Follow the personal protection and controls set forth in Section 8 of this MSDS when handling this product. Respirable crystalline silica containing dust may be generated during processing, handling and storage.

Section 8 - EXPOSURE CONTROLS/PERSONAL PROTECTION
Skin Protection
Wash dust-exposed skin with soap and water before eating, drinking, smoking, and using the toilet facilities. Wash work clothes after each use.
Respiratory Protection
Avoid actions that cause dust to become airborne. Use local or general exhaust ventilation to control exposures below applicable exposure limits. Use NIOSH/MSHA approved (under 30 CFR 11) or NIOSH approved (under 42 CFR 84) respirators in poorly ventilated areas, if an applicable exposure limit is exceeded, or when dust causes discomfort or irritation. (Advisory: Respirators and filters purchased after June 10, 1998 must be certified under 42 CFR 84.)
Ventilation
Use local exhaust or general dilution ventilation to control exposure within applicable limits.
Eye Protection
Safety glasses with side shields should be worn as minimum protection. In extremely dusty environments and unpredictable environments wear unvented or indirectly vented goggles to avoid eye irritation or injury. Contact lenses should not be worn when working with products which may generate airborne dust.

Section 9 - PHYSICAL AND CHEMICAL, PROPERTIES
Physical state...........Solid
Odor........................No distinct odor
Solubility in water....Negligible
Vapor pressure.......Not applicable
Vapor density........Not applicable
Boiling point.........Not applicable (i.e., > 1000 C)
Melting point........Not applicable
Specific gravity (H20 = 1.0)....2.55-2.85
Evaporation rate......Not applicable
Section 10 - STABILITY AND REACTIVITY

**Stability:** Stable.

Conditions to avoid: Avoid contact with incompatible materials (see below).

**Incompatibility:**
Materials to avoid include; powerful oxidizing agents such as fluoride, boron trifluoride, chlorine trifluoride, manganese trifluoride, and oxygen defluoride. Contact of these materials may cause fire and/or explosions. Silica dissolves in hydrofluoric acid producing a corrosive gas – silicon tetrafluoride.

**Hazardous decomposition:** Will not spontaneously occur. Silica-containing respirable dust particles may be generated by handling.

**Hazardous Polymerization:** Will not occur.

Section 11 - TOXICOLOGICAL INFORMATION

**Acute and Chronic Toxicity**

A. General Product Information
   - LD50/LC50 - No information available for this product

B. Component Analysis – LD50/LC50
   - Quartz (14808-60-70 Oral LD50 Rat:500 mg/kg

**Carcinogenicity**

A. General Product Information
   - There may be a relationship between silicosis and certain cancers

B. Component Analysis – Quartz (14808-60-7)
   - ACGIH: A2 – Suspected Human Carcinogen
   - NIOSH: potential occupational carcinogen
   - NTP: Known Human carcinogen

Section 12 - ECOLOGICAL INFORMATION

Ecotoxicity: No recognized unusual toxicity to plants or animals

Relevant physical and chemical properties
(See Sections 9 and 10.)

Section 13 - DISPOSAL

Pickup and reuse clean materials. Dispose of waste materials in accordance with applicable federal, state, and local laws and regulations.

Where applicable, dispose of bags in an approved landfill or incinerator.

Section 14 - TRANSPORTATION DATA

Hazardous materials description/proper shipping name

*Not hazardous under U.S. Department of Transportation (DOT) regulations.

Hazard class Identification number

*Not applicable. Not applicable

Required label text Hazardous substances/reportable quantities (RQ)

*Not applicable. Not applicable.
**Section 15 - OTHER REGULATORY INFORMATION**

Limestone is considered a "hazardous chemical" under this regulation, and should be part of any hazard communication program.

Status under CERCLA/SUPERFUND 40 CFR 117 and 302: Not listed.

Hazard Category under SARA(Title III), Sections 311 and 312
Limestone qualifies as a "hazardous substance" with delayed health effects.

Status under SARA (Title III), Section 313
Not subject to reporting requirements under Section 313.

Status under TSCA (as of May 1997)
Some substances in limestone are on the TSCA inventory list.

Status under the Federal Hazardous Substances Act
Limestone is a "hazardous substance" subject to statutes promulgated under the subject act.

Status under California Proposition 65
This product contains up to 0.05 percent of chemicals (trace elements) known to the State of California to cause cancer, birth defects or other reproductive harm. California law requires the manufacturer to give the above warning in the absence of definitive testing to prove that the defined risks do not exist.

**Canadian WHMIS Classification:** Class D, Div. 2, Sub A

**Component Analysis – Inventory**

**Dolomite (CaMg(CO3)2)** – 60-100% by weight (CAS# 16389-88-1)
TSCA – Yes, DSL- NO, NDSL-Yes, EINECS- Yes, AUST- Yes, Phil –Yes, MITI-No
Korea-Yes, ELINCS-No, China -Yes

**Quartz** – 0.0-1.0% by weight (CAS #14808-60-7)
TSCA – Yes, DSL- Yes, NDSL-NO, EINECS- Yes, AUST- Yes, Phil –Yes, MITI-Yes
Korea-Yes, ELINCS-No, China -Yes

**Component Analysis – WHMIS IDL**
Quartz – (CAS #14808-60-7)
Present - Yes
